

AMENDMENTS TO CLAIMS

1. (Currently amended) A method of reproducing information ~~using an information recording medium~~ in a client/server system, the method comprising the steps of:

providing an information recording medium containing characteristic information and having other information recorded thereon;

(a) a client obtaining the characteristic information of the information recording medium;

(b) the client transmitting the characteristic information to a server;

(c) the server obtaining usage information of the information recording medium based on the characteristic information;

(d) subsequently, the server transmitting information based on the usage information to the client; and

(e) subsequently, the client reproducing the other information recorded on the information recording medium in accordance with the information based on the usage information.

2. (Currently amended) A method of reproducing information using an information recording medium in a client/server system, the method comprising the steps of:

providing a second server containing second information;

(a) subsequently, a client obtaining characteristic information of the information recording medium;

(b) the client transmitting the characteristic information to a first server;

(c) the first server obtaining usage information of the information recording medium based on the characteristic information;

(d) the first server transmitting first information based on the usage information to [[a]] the second server;

(e) the second server transmitting said second information ~~stored therein~~ to the client in accordance with the first information based on the usage information; and

(f) the client reproducing the information based on the second information received from the second server.

3. (Currently amended) The method as claimed in claim 2, wherein ~~in said step (b)~~, the client transmits the characteristic information to the first server via the second server.

4. (Canceled)

5. (Currently amended) A server providing information to a client using an information recording medium in response to a request of the client, the server comprising:

a first part configured to receive characteristic information of the information recording medium from the client;

a second part configured to obtain usage information of the information recording medium based on the characteristic information; and

a third part configured to transmit to the client information on authorization of reproduction of information from the information recording medium based on the usage information, to enable the reproduction of said information from the information recording medium.

6. (Original) The server as claimed in claim 5, further comprising:
a fourth part configured to receive from the client the characteristic
information of the information recording medium and notification requesting stoppage
of usage of the characteristic information; and
a fifth part configured to delete the usage information of the information
recording medium based on the characteristic information.

7. (Currently amended) A computer-readable recording medium storing a
program for causing a computer to execute a method, the method comprising the
steps of:

(a) receiving, based on a request of a client using an information recording
medium, characteristic information of the information recording medium from the
client;
(b) obtaining usage information of the information recording medium based
on the characteristic information; and
(c) transmitting to the client information on authorization of reproduction of
information from the information recording medium based on the usage information,
and thereby enabling the reproduction of said information from the information
recording medium.

8. (Original) The computer-readable recording medium as claimed in
claim 7, wherein the method further comprises the steps of:

(d) receiving from the client the characteristic information of the information
recording medium and notification requesting stoppage of usage of the characteristic
information; and
(e) deleting the usage information of the information recording medium
based on the characteristic information.

9. (Canceled)

10. (Currently amended) A computer-readable recording medium storing a program for causing a computer to execute a method, the method comprising the steps of:

providing an information recording medium having characteristic information and other information recorded thereon;

(a) subsequently, obtaining the characteristic information of [an] the information recording medium;

(b) requesting a server to provide information and transmitting the characteristic information to the server so that the server obtains usage information of the information recording medium;

(c) receiving information based on the usage information from the server; and

(d) subsequently, reproducing the other information recorded on the information recording medium in accordance with the information based on the usage information.
